## SUMMARY

---

Computer Science student specializing in full-stack development and applied AI engineering, with hands-on experience building production-ready web applications and intelligent AI-powered systems. Seeking a software development or AI engineering internship.

## EDUCATION

---

2023 – 2027 B.Tech, Computer Science & Engineering at **Graphic Era Deemed University**  
2021 – 2023 Senior Secondary (CBSE), **Nirmala Convent Sr. Sec. School, Kathgodam**

## PROJECTS

---

**SafeNav Web & Link Safety Analysis Platform** | *FastAPI, PostgreSQL, React, asyncio* [GitHub](#)

- Engineered a 3-tier asynchronous heuristic engine (Lexical, SSL/TLS, and IP Intelligence) that exposes exact per-rule scoring, eliminating the black-box nature of traditional URL scanners.
- Minimized scan latency by structuring the FastAPI backend to execute heavy, network-bound threat intelligence queries concurrently via Python's `asyncio.gather`.
- Implemented an in-memory caching daemon that syncs 100,000+ trusted domains via a background thread, optimizing API throughput and preventing false positives.
- Secured the backend with asynchronous PostgreSQL (SQLAlchemy) for scan history persistence and implemented strict SSRF protections to prevent internal network scanning.

**PagePilot – AI Document Assistant** | *Next.js, FastAPI, LangChain, FAISS, Gemini API* [GitHub](#)

- Engineered a RAG pipeline capable of ingesting 50+ page technical documents, chunked into 1,000-character overlapping segments (overlap=200) to maximize context retention during retrieval.
- Implemented local HuggingFace embeddings (`all-MiniLM-L6-v2`) with FAISS vector search, ensuring zero-data-leakage document processing and eliminating embedding API costs entirely.
- Delivered sub-2-second query resolution by pairing local FAISS indexing with Gemini 2.5 Flash Lite; architected a decoupled Next.js + Redux frontend communicating with a FastAPI backend via REST APIs.

## SKILLS

---

|                    |                                                             |
|--------------------|-------------------------------------------------------------|
| Programming:       | C++, Python, SQL                                            |
| Web Development:   | HTML, CSS, JavaScript, React.js                             |
| Backend & APIs:    | Node.js, Express.js, Spring Boot, FastAPI, REST APIs, Redis |
| Databases:         | MySQL, PostgreSQL                                           |
| Generative AI:     | LLMs, LangChain, Hugging Face, RAG, FAISS (Vector DB)       |
| Cloud & DevOps:    | AWS EC2, AWS S3, Load Balancer, Docker, Linux               |
| Core Concepts:     | Data Structures & Algorithms                                |
| Tools & Platforms: | Git, GitHub, Postman, PyCharm, VS Code                      |

## CERTIFICATIONS

---

|                                          |                            |                     |
|------------------------------------------|----------------------------|---------------------|
| Cloud Essentials                         | AWS Skill Builder, Virtual | Aug 2025 – Present  |
| AWS Artificial Intelligence Practitioner | AWS Skill Builder, Virtual | Jul 2025 – Nov 2025 |
| Blockchain And Its Applications          | NPTEL, Virtual             | Jan 2025 – Apr 2025 |
